Summary

Motivated Java Developer with hands-on experience building scalable applications using Java, Spring Boot, React/React Native, microservices, and modern databases. Published a CLI tool to Maven Central. Contributed to the open-source project JabRef, with merged contributions enhancing its JavaFX-based user interface.

Education

B.Tech SGT University, Computer Science

Gurugram, India
Aug 2023 – present

Experience

SGT University, App Developer ▼

Gurugram, Haryana
May 2024 – Oct 2024

- Developed a mental wellness mobile app with mood tracking, trend analysis, guided breathing, grounding exercises, and mandala coloring (3-member team)
- Used React Native and Expo Go to build, test and upgrade UI and made it 50% more attractive
- Built secure backend with Supabase (authentication, data storage), reducing API calls by 30%

Projects

Ordo: Command-Line Tool ▼

Jan 2026 – Jan 2026

Picocli, Java 21, GraalVM

- Built a CLI tool using Picocli and Java 21 for file and folder management capabilities, compiled via GraalVM Native Image for cross-platform distribution without any JVM requirement.
- Optimized release pipeline with GPG signing, automated checks, and Maven Central deployment ([io.github.shawshank725:ordo:1.0.0](https://github.com/shawshank725/ordo:1.0.0) ▼), cutting release cycles by 40%.
- Released standalone native binary and comprehensive source code through [GitHub Releases](#) ▼.

Social Media Platform ▼

June 2025 – July 2025

Spring Boot, React.js, MySQL, Modulith, Docker, Cloudinary, Web sockets

- Developed and deployed a real-time social media platform using Spring Boot Modulith, React, WebSockets, MySQL, Session-based authentication and Cloudinary, supporting posts, likes, bookmarks, follows, profiles, and notifications.
- Refactored an 8-service microservices architecture into a modular monolith using Spring Modulith, reducing the codebase from 15.5k to 14.7k lines while eliminating inter-service communication overhead and simplifying deployment.
- Designed domain-driven modules with module boundaries validated through Spring Modulith verification tests.

Skills

Languages: Java, Python, C

Back-end: Spring Boot, Flask, Java AWT & Swing, JavaFX, Picocli, Expo Go

Front-end: HTML, CSS, JavaScript, TypeScript, React, React Query, React Native

Databases: MySQL, PostgreSQL, Firebase, Supabase

DevOps & Tools: Docker, Git, Postman, IntelliJ IDEA, Android Studio, VS Code, GraalVM, GitHub Actions

Soft Skills: Strong problem-solving, Team collaboration, Curiosity, High ownership mindset, Critical thinking, Fast learning

Key Achievements

Open Source Contribution: [JabRef](#) ▼ – Enhanced Cite-as-you-write dialog UI by analyzing JavaFX components with Scenic View and applying CSS fixes in Dark.css; contribution merged ([PR](#) ▼, [Issue](#) ▼)

Hackathon: 3rd Place – Code Sangam Hackathon 2024 (Feb 2024): Built a web platform for Farmers' Producer Organizations (FPOs) to purchase farming materials and access market and weather data

Tech Fest: Synergy Techno Fest (Nov 2025): Presented the C.A.L.M. App developed for the university. Received over 100 feedbacks
