

Shashank Verma

(Full-stack Java Developer)

Phone No.: +91-8053400860 | vermashashank070205@gmail.com | **LinkedIn:** [@shashankv725](#) | **Github:** [@shawshank725](#)
Leetcode: [@shashankverma123725](#) | **Hackerrank:** [@vermashashank071](#)

Professional Summary

Computer Science undergraduate (2023–2027) with hands-on experience building full-stack applications using Java, Spring Boot, React, and React Native. Completed a Frontend AI Engineering internship focused on AI-assisted software development workflows and contributed merged improvements to the open-source project JabRef. Interested in backend systems and scalable software engineering.

Education

SGT University, Gurugram, Haryana | *B. Tech in Computer Science and Engineering*

Aug. 2023 – Aug. 2027

Skills

- **Languages:** Java, Python, C
- **Front-end:** HTML5, CSS3, JavaScript, TypeScript, React.js, React Query (TanStack Query), React Native
- **Back-end:** Spring Boot, Spring Security, REST APIs, JWT, WebSockets, Microservices, Spring Modulith, Flask
- **Databases:** MySQL, PostgreSQL, Supabase, Firebase
- **DevOps & Tools:** Docker, Git, Maven, Postman, IntelliJ IDEA, VS Code, Android Studio
- **Operating Systems:** Linux, Windows
- **Desktop Development:** JavaFX, Java AWT & Swing

Work Experience

Frontend AI Engineering Intern, FlyRank AI | July 2026 – September 2026

Tech stack: React.js, AI-assisted programming, TypeScript, OpenCode

- Completed a Frontend AI Engineering internship focused on AI-assisted software development workflows.
- Built and documented AI-assisted development workflows using structured prompting, project-level instructions, and coding-agent tools.
- Applied AI-assisted workflows to frontend development, debugging, documentation, and developer tooling tasks.

App Developer, SGT University | July 2025 – October 2025

Tech stack: React Native, Expo, Supabase

- Developed a mental wellness mobile app with mood tracking, trend analysis, guided breathing, grounding exercises, and mandala coloring (3-member team)
- Implemented authentication, database, and storage workflows using Supabase Authentication and PostgreSQL.
- Published the application on Google Play Store, receiving 100+ downloads

Projects

Social Media Platform | June 2025-July 2025 | *Tech stack: Spring Boot, React.js, MySQL, Cloudinary, Websockets*

- Built full-stack social media platform featuring posts, likes, bookmarks, follows, profiles, and real-time notifications
- Consolidated eight independently deployed services into a Spring Modulith-based modular monolith, reducing deployment complexity while preserving modular architecture.
- Architected responsive React front-end with React Query and reduced module dependency.
- Deployed the project's backend on Render, frontend on Netlify and PostgreSQL database on Neon.

Key Achievements

- **Open Source Contribution: [JabRef](#)** – Contributed to the open-source reference manager JabRef by identifying and fixing JavaFX UI rendering issues in the Cite-As-You-Write dialog; contribution accepted and merged into the main repository. ([PR](#), [Issue](#))
- **Synergy Tech Fest (Nov 2025):** Presented the C.A.L.M. App developed for the university. Received over 100 feedbacks.
- **TCS iON NQT – IT (2026):** Scored 81.84 percentile in the Cognitive Skills section, with 72.47% in Java hands-on programming and 56.88% in Advanced Quantitative & Reasoning.
